SYMPOSIUM ON CELL AND MOLECULAR BIOLOGY OF BASEMENT MEMBRANES IN HEALTH AND DISEASE

Forefronts in Nephrology
Arlie, Virginia, USA
September 20–22, 1991

Introduction. *Nicholas A. Kefalides, Lance A. Liotta, and Eric G. Neilson* 1

MOLECULAR INTERACTIONS—CELL RECEPTORS

Laminin variants: Why, where and when? *Eva Engvall* 2

Nidogen mediates the formation of ternary complexes of basement membrane components. *Monique Aumailley, Cristina Battaglia, Ulrike Mayer, Dieter Reinhardt, Roswitha Nischt, Rupert Timpl, and Jay W. Fox* 7

Biological functions of entactin. *Albert E. Chung, Li-Jin Dong, Chuanyue Wu, and Marian E. Durkin* 13

Role of laminin in endothelial cell recognition and differentiation. *H. William Schnaper, Hynada K. Kleinman, and Derrick S. Grant* 20

Adhesion and activation of human neutrophils on basement membrane molecules. *Jacques P. Borel, Georges Bellon, Roselyne Garnotel, and J.C. Monboisse* 26

Interaction between the 67 kilodalton metastasis-associated laminin receptor and laminin. *Vittoria Cioce, Inger M.K. Margulies, Mark E. Sobel, and Vincent Castronovo* 30

MOLECULAR BIOLOGY AND REGULATION OF GENE EXPRESSION

Molecular genetics of Alport syndrome. *Karl Tryggvason, Jing Zhou, Sirkka Liisa Hostikka, and Thomas B. Shows* 38

Differential expression of type I collagen and cellular fibronectin isoforms in endothelial cell variants. *Jeanne C. Myers* 45

Perlecan, the large low-density proteoglycan of basement membranes: Structure and variant forms. *Douglas M. Noonan and John R. Hassell* 53

DEVELOPMENT AND GROWTH REGULATION

Endothelial integrins and their role in maintaining the integrity of the vessel wall. *Elisabetta Dejana, Marco Raiteri, Massimo Resnati, and Maria Grazia Lampugnani* 61

Role of laminin carbohydrates on cellular interactions. *Marvin L. Tanzer, Subramanian Chandrasekaran, John W. Dean III, and Martin S. Giniger* 66

Laminin distribution in developing glomerular basement membranes. *Dale R. Abrahamson and Patricia L. St. John* 73

Basement membrane proteoglycans and development. *John R. Couchman, Dale R. Abrahamson, and Kevin J. McCarthy* 79

BASEMENT MEMBRANES IN DISEASE

Heterogeneity of antibodies in Goodpasture syndrome reacting with type IV collagen. *Nicholas A. Kefalides, Nobuko Ohno, and Curtis B. Wilson* 85

Contents continued on next page

Identification of antigenic epitopes in type IV collagen by use of synthetic peptides. *Nicholas A. Kefalides, Nobuko Ohno, Curtis B. Wilson, Howard Fillit, John Zabriski, and Joel Rosenbloom.* 94

Polycystic kidney disease: Primary extracellular matrix abnormality or defective cellular differentiation? *James P. Calvet* 101

The glomerular mesangium in diabetes mellitus. *Jeffrey I. Kreisberg and Suzanne H. Ayo* 109

Renal tubular basement membrane and collagen type IV in diabetes mellitus. *Fuad N. Ziyadeh* . 114

Expression of type I collagen mRNA in glomeruli of rats with passive Heymann nephritis. *Andrew W. Minto, Mitchell A. Fogel, Yasuhiro Natori, Yvonne M. O'Meara, Dale R. Abrahamson, Barbara Smith, and David J. Salant* 121

Immune modulation of biologic systems in renal somatic cells. *Jerry Yee and Eric G. Neilson*... 128

Molecular characteristics of the Goodpasture autoantigen. *Billy G. Hudson, Raghuram Kalluri, Sripad Gunwar, Milton E. Noelken, Mariko Mariyama, and Stephen T. Reeders*..... 135

Role of a basement membrane glycoprotein in anti-tubular basement membrane nephritis. *Gretchen S. Crary, Avi Katz, Alfred J. Fish, Alfred F. Michael, and Ralph J. Butkowski* 140

Basement membrane biosynthesis as a target for developing inhibitors of angiogenesis with anti-tumor properties. *Michael E. Maragoudakis, Eleftheria Missirlis, George D. Karakiulakis, Mariana Sarmonica, Maria Bastakis, and Nikos Tsopanoglou* 147

Cytoskeletal agents inhibit motility and adherence of human tumor cells. *Mary L. Stracke, Mehrdad Soroush, Lance A. Liotta, and Elliott Schiffmann* 151

Human 92 kDa type IV collagenase: Functional analysis of fibronectin and carboxyl-end domains. *Alex Y. Strongin, Ivan E. Collier, Peter A. Krasnov, L. Teresa Genrich, Barry L. Marmer, and Gregory I. Goldberg* 158

Cellular activation of the 72 kDa type IV procollagenase/TIMP-2 complex. *Peter D. Brown, David E. Kleiner, Edward J. Unsworth, and William G. Stetler-Stevenson* 163

HISTORICAL ARCHIVES

Remembering Homer Smith. *Robert W. Berliner* 171

LABORATORY INVESTIGATION

Characterization of acid-base transport mechanisms in the kidney cell line RCCT-28A. *Elsa Bello-Reuss, with the technical assistance of Leigh Cabell-Kluch and Yuzhen Pan* 173

Characterization of peanut-lectin (+) cells derived from the RCCT-28A cell line. *Elsa Bello-Reuss, with the technical assistance of Leigh Cabell-Kluch and Pamela Tyler*..... 182

Response of genetic hypercalciuric rats to a low calcium diet. *Mark Kim, Nelson E. Sessler, Vrishali Tembe, Murray J. Favus, and David A. Bushinsky*..... 189

Dopamine DA_2-receptor activation inhibits noradrenaline release in human kidney slices. *Lars C. Rump, Eckhard Schwertfeger, Martin J. Schuster, Ulrike Schaible, Alexander Frankenschmidt, and Peter J. Schollmeyer* 197

Role of NO on pressure-natriuresis in Wistar-Kyoto and spontaneously hypertensive rats. *Hideki Ikenaga, Hiromichi Suzuki, Naohito Ishii, Hajime Itoh, and Takao Saruta*..... 205

CLINICAL INVESTIGATION

Effect of insulin-plus-glucose infusion with or without epinephrine on fasting hyperkalemia. *Michael Allon, Azita Takeshian, and Nancy Shanklin*..... 212

LDL stimulates mesangial fibronectin production and chemoattractant expression. *Brad H. Rovin and Laura C. Tan*..... 218

Human peritoneal mesothelial cells synthesize interleukin-6: Induction by IL-1β and TNFα. *Nicholas Topley, Achim Jörres, Werner Luttmann, Meryl M. Petersen, M. Janine Lang, Karl-Heinz Thierauch, Christian Müller, Gerald A. Coles, Malcolm Davies, and John D. Williams* 226

Contents continued on next page

NMR spectroscopy as a novel approach to the monitoring of renal transplant function. *Peta J.D. Foxall, George J. Mellotte, Michael R. Bending, John C. Lindon, and Jeremy K. Nicholson*.... 234

Nephron segment-specific inhibition on Na^+/K^+-ATPase activity by cyclosporin A. *James A. Tumlin and Jeff M. Sands* 246

NEPHROLOGY FORUM

Growth factors in glomerulonephritis. *Hanna E. Abboud*..... 252

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings..... 268

Awards and Grants 270

Travel Award form; 1993 ISN Congress in Jerusalem 272

Instructions for Authors on pages xxii–xxiv

KIDNEY INTERNATIONAL

Volume 43, Supplement 39

Molecular Approaches to Nephrology:

Prospects in Diagnosis and Management

Bari, Italy

March 19–22, 1992

Official Journal of the International Society of Nephrology

Le Journal Official de la Société Internationale de Néphrologie

Table of contents

Introduction. *F. Paolo Schena, Steven N. Emancipator, and J. Stewart Cameron* S-1

IMMUNOGENETIC STUDIES

Immunogenetic findings in glomerulonephritis. *Michael H. Rambausek, Rüdiger Waldherr, and Eberhard Ritz* S-3

MHC gene polymorphism in primary IgA nephropathy. *Richard Moore* S-9

Molecular mapping of the HLA class II region in HLA-DR3 associated idiopathic membranous nephropathy. *Steven H. Sacks, Catherine Warner, R. Duncan Campbell, and Ian Dunham* ... S-13

Positional cloning approach to the dominant polycystic kidney disease gene, PKD1. *Gregory G. Germino, Stefan Somlo, Debra Weinstat-Saslow, and Stephen T. Reeders* S-20

CYTOKINES AND GLOMERULAR CELLS

Cytokines and mesangial cells. *R. Bernd Sterzel, Eckhard Schulze-Lohoff, and Martin Marx* .. S-26

Effect of cytokines on the cytoskeleton of resident glomerular cells. *Giovanni Camussi, Filippo Mariano, Luigi Biancone, Giuseppe Montrucchio, and Antonio Vercellone* S-32

Modulation of renal production of C3 by proinflammatory cytokines. *Vincenzo Montinaro, Mariella Di Cillo, Sabrina Perissutti, Leonardo Serra, Francesco Tedesco, Abdalla Rifai, and Francesco Paolo Schena* S-37

Cytokine mRNA expression by cultured rat mesangial cells after contact with environmental lectins. *Alessandro Amore, Federica Cavallo, Elena Bocchietto, Federico Bussolino, Bruno Gianoglio, Licia Peruzzi, Maria G. Porcellini, and Rosanna Coppo* S-41

MATRIX EXPRESSION AND GLOMERULAR DISEASES

Factors involved in the regulation of mesangial cell proliferation *in vitro* and *in vivo*. *Jürgen Floege, Eudora Eng, Bessie A. Young, and Richard J. Johnson* S-47

Studies by competitive PCR of glomerulosclerosis in growth hormone transgenic mice. *Emmanuel P. Peten, Liliane J. Striker, Arlyn Garcia-Perez, and Gary E. Striker* S-55

CYTOKINES, GROWTH FACTORS AND GLOMERULAR DISEASE

Role of tumor necrosis factor-α in the pathogenesis of glomerular diseases. *Jesús Egido, Marta Gómez-Chiarri, Alberto Ortíz, Carmen Bustos, Javier Alonso, Carmen Gómez-Guerrero, Dulcenombre Gomez-Garre, Maria José Lopez-Armada, Juanjo Plaza, and Eva Gonzalez* S-59

Cytokines, mesangial cell activation and glomerular injury. *John R. Sedor, Martha Konieczkowski, Shaoming Huang, Joseph H. Gronich, Yuichi Nakazato, Gideon Gordon, and Charles H. King* S-65

Role of interleukin–6 in the progression of mesangial proliferative glomerulonephritis. *Yasuhiro Horii, Masayuki Iwano, Eiji Hirata, Hideo Shiiki, Yoshihiro Fujii, Kazuhiro Dohi, and Hyoe Ishikawa* S-71

Role of endothelin in glomerular injury. *Norberto Perico and Giuseppe Remuzzi* S-76

The intercrine superfamily and renal disease. *Marta Gómez-Chiarri, Alberto Ortíz, Daniel Serón, Eva Gonzalez, and Jesús Egido* S-81

Contents continued on next page

Platelet-derived growth factor and proliferative glomerulonephritis. *Loreto Gesualdo, Elena Ranieri, Giovanni Pannarale, Salvatore Di Paolo, and Francesco Paolo Schena* S-86

Glomerulosclerosis in mice transgenic for native or mutated bovine growth hormone gene. *Chih-Wei Yang, Liliane J. Striker, John J. Kopchick, Wen Y. Chen, Carlo M. Pesce, Emmanuel P. Peten, and Gary E. Striker* S-90

Expression of 5-lipoxygenase and 5-lipoxygenase activation protein in glomerulonephritis. *Abdalla Rifai, Hideto Sakai, and Mitsunori Yagame* S-95

MOLECULAR ASPECTS OF TUBULO INTERSTITIAL INJURY

Angiotensin II as a hypertrophogenic cytokine for proximal tubular cells. *Gunter Wolf and Eric G. Neilson* S-100

Renal tubular epithelial and T cell interactions in autoimmune renal disease. *Vicki Rubin Kelly, Cristina Diaz-Gallo, Anthony M. Jevnikar, and Gary G. Singer* S-108

Gene transfer into the mammalian kidney: First steps towards renal gene therapy. *Adrian S. Woolf, Ricardo J. Bosch, and Leon G. Fine* S-116

MOLECULAR ASPECTS OF RENAL TRANSPLANTATION

Prospects for anti-rejection therapies based upon CD8-dependent immunoregulation. *Mark L. Tykocinski and David R. Kaplan* S-120

Interaction between T lymphocytes and kidney epithelial cells during renal allograft rejection. *John A. Kirby, Magaral R. Rajasekar, Yvan Lin, George Proud, and R.M.R. Taylor* S-124

Differential *in situ* expression of cytokine genes in human renal transplantation. *Michael G. Tovey, Anne Deglise-Favre, and Damien Schoevaert* S-129

Analysis of T cell lines from rejecting renal allografts. *Benito A. Yard, Mariska Kooymans-Couthino, Thomas Reterink, Peter van den Elsen, Marion E. Paape, Jan Antony Bruyn, Leendert A. van Es, Mohammed R. Daha, and Fokko J. van der Woude* S-133

MOLECULAR ASPECTS OF HEMODIALYSIS

Induction of interleukin-1 during hemodialysis. *Nicole Haeffner-Cavaillon, Gerlinde Jahns, Jean-Louis Poignet, and Michel D. Kazatchkine* S-139

Induction of mRNA for tumor necrosis factor α in hemodialysis. *Dario Roccatello, Sandra D'Alfonso, Daniela Peruccio, Giacomo Quattrocchio, Guido Cavalli, Ciro Isidoro, Giuseppe Piccoli, and Patricia Momigliano Richiardi* S-144

Influence of hemodialysis on interleukin 6 production and gene expression by peripheral blood mononuclear cells. *Giovanni Pertosa, Loreto Gesualdo, Emilia A. Tarantino, Elena Ranieri, Davide Bottalico, and Francesco P. Schena* S-149

Role of platelet activating factor in hemodialysis. *Ciro Tetta, Salvatore David, Luigi Biancone, Francesco Canino, Vincenzo Cambi, and Giovanni Camussi* S-154

Instructions for Authors on page iv

KIDNEY INTERNATIONAL

Volume 43, Number 2, February 1993

Official Journal of the International Society of Nephrology

Le Journal Officiel de la Société Internationale de Néphrologie

Table of contents

EDITORIAL REVIEW

Endopeptidase-24.11 and its inhibitors: Potential therapeutic agents for edematous disorders and hypertension. *Martin R. Wilkins, Robert J. Unwin, and A. John Kenny* 273

LABORATORY INVESTIGATION

PDGF-receptor localizes to mesangial, parietal epithelial, and interstitial cells in human and primate kidneys. *Charles E. Alpers, Ronald A. Seifert, Kelly L. Hudkins, Richard J. Johnson, and Daniel F. Bowen-Pope* 286

Effect of protein kinase C activation and down-regulation on active calcium transport. *René J.M. Bindels, Jacqueline A. Dempster, Peter L.M. Ramakers, Peter H.G.M. Willems, and Carel H. van Os* 295

Prostaglandin synthesis inhibition stimulates lithium reabsorption in the Henle's loop in rats. *Walter H. Boer, René Fransen, Peter Boer, Remmert de Roos, and Hein A. Koomans* 301

Extra-natriuretic effects of atrial peptide in humans. *Luca De Nicola, Giulio Romano, Bruno Memoli, Bruno Cianciaruso, Massimo Sabbatini, Domenico Russo, Alfredo Caglioti, Giorgio Fuiano, Antonio Dal Canton, and Giuseppe Conte* 307

Visualization of serotonin effects on renal vessels of rats. *Karlhans Endlich, Regina Kühn, and Michael Steinhausen, with the technical assistance of Rudolf Dussel* 314

Somatostatin antagonizes angiotensin II effects on mesangial cell contraction and glomerular filtration. *Carmen García-Escribano, Maria Luisa Díez-Marqués, Mercedes Gonzáles-Rubio, Manuel Rodrígues-Puyol, and Diego Rodríguez-Puyol* 324

Renal basement membranes by ultrahigh resolution scanning electron microscopy. *Kazue Hironaka, Hirofumi Makino, Yasushi Yamasaki, and Zensuke Ota* 334

Effects of angiotensin II receptor blockade on remnant glomerular permselectivity. *Gert Mayer, Richard A. Lafayette, James Oliver, William M. Deen, Bryan D. Myers, and Timothy W. Meyer* . 346

Renal endothelin gene expression is increased in remant kidney and correlates with disease progression. *Silvia Orisio, Ariela Benigni, Isabella Bruzzi, Daniela Corna, Norberto Perico, Carla Zoja, Luca Benatti, and Giuseppe Remuzzi* 354

Fish oil has protective and therapeutic effects on proteinuria in passive Heymann nephritis. *Wolfgang J. Weise, Yasuhiro Natori, Jerrold S. Levine, Yvonne M. O'Meara, Andrew W. Minto, Eric C. Manning, D. Jordi Goldstein, Dale R. Abrahamson, and David J. Salant* 359

CLINICAL INVESTIGATION

Heparin suppresses mesangial cell proliferation and matrix expansion in experimental mesangioproliferative glomerulonephritis. *Jürgen Floege, Eudora Eng, Bessie A. Young, William G. Couser, and Richard J. Johnson* 369

Structural-functional relationships in type I mesangiocapillary glomerulonephritis. *Masuji Hattori, Youngki Kim, Michael W. Steffes, and S. Michael Mauer* 381

Effects of insulin-like growth factor I on renal function in normal men. *Raimund Hirschberg, Giuliano Brunori, Joel D. Kopple, and Hans-Peter Guler* 387

Effects of kidney or kidney-pancreas transplantation on plasma pentosidine. *Donald E. Hricik, James A. Schulak, David R. Sell, John F. Fogarty, and Vincent M. Monnier* 398

Contents continued on next page

Survival analysis of dialysis patients in Okinawa, Japan (1971–1990). *Kunitoshi Iseki, Nobuyuki Kawazoe, Akira Osawa, and Koshiro Fukiyama* 404

Lipoprotein heterogeneity in end-stage renal disease. *Jorge Joven, Elizabet Vilella, Suhail Ahmad, Marian C. Cheung, and John D. Brunzell* 410

Converting-enzyme inhibitor versus calcium antagonist in cyclosporine-treated renal transplants. *Georges Mourad, Jean Ribstein, and Albert Mimran* 419

Urinary excretion of platelet activating factor in patients with immune-mediated glomerulonephritis. *Marina Noris, Ariela Benigni, Paola Boccardo, Eliana Gotti, Emilio Benfenati, Sistiana Aiello, Marta Todeschini, and Giuseppe Remuzzi* 426

Localization of apolipoprotein(a) and B-100 in various renal diseases. *Hirokazu Sato, Satoru Suzuki, Mitsuhiro Ueno, Hisaki Shimada, Ryou Karasawa, Shin-Ichi Nishi, and Masaaki Arakawa* 430

The spectrum of bone disease in end-stage renal failure—An evolving disorder. *Donald J. Sherrard, Gavril Hercz, York Pei, Norma A. Maloney, Celia Greenwood, Arif Manuel, Carl Saiphoo, Stanley S. Fenton, and Gino V. Segre* 436

Effects of dietary protein restriction on hemodynamics in chronic renal failure. *Masayoshi Shichiri, Yasuhide Nishio, Mitsuo Ogura, Matsuhiko Suenaga, and Fumiaki Marumo* 443

Organic osmolytes in human and other mammalian kidneys. *Peter C.B. Sizeland, Stephen T. Chambers, Michael Lever, Lois M. Bason, and Richard A. Robson* 448

Distribution of GBM heparan sulfate proteoglycan core protein and side chains in human glomerular diseases. *Jacob van den Born, Lambert P.W.J. van den Heuvel, Marinka A.H. Bakker, Jacques H. Veerkamp, Karel J.M. Assmann, Jan J. Weening, and Jo H.M. Berden* 454

TECHNICAL NOTE

New technique to assess hypoxia-induced cell injury in individual isolated renal tubules. *Andreas Kribben, Jack F.M. Wetzels, Eric D. Wieder, Thomas J. Burke, and Robert W. Schrier* 464

Permeable type I collagen membrane promotes glomerular epithelial cell growth in culture. *Kazuo Nosaka, Tadahiro Nishi, Hiromi Imaki, Keiji Suzuki, Shoji Kuwata, Eisei Noiri, Chikara Aizawa, and Kiyoshi Kurokawa* 470

RAPID COMMUNICATIONS

Suppression of experimental crescentic glomerulonephritis by the interleukin-1 receptor antagonist. *Hui Y. Lan, David J. Nikolic-Paterson, Mario Zarama, James L. Vannice, and Robert C. Atkins* 479

COL4A5 split site mutation and $\alpha 5$(IV) collagen mRNA in Alport syndrome. *Kai-Olaf Netzer, Oliver Pullig, Ulrich Frei, Jing Zhou, Karl Tryggvason, Manfred Weber* 486

NEPHROLOGY FORUM

Renovascular disease in children. *Julie R. Ingelfinger* 493

INTERNATIONAL SOCIETY OF NEPHROLOGY

Meetings 507

Awards and Grants 509

Special Subscription Offer for Fellows 510

Travel Award form; 1993 ISN Congress in Jerusalem 511

Volume 43, Supplement 40

"Options in Renal Therapy"

Key Biscayne, Florida, USA

December 5–7, 1992

Table of contents

Introduction. *Karl D. Nolph and Lee W. Henderson* S-1

Morbidity and mortality of CAPD and hemodialysis. *Rosario Maiorca, Giovanni C. Cancarini, Giulio Brunori, C. Camerini, and Luigi Manili* S-4

Comparative morbidity among hemodialysis and continuous ambulatory peritoneal dialysis patients. *David N. Churchill* S-16

Quality of life in patients undergoing renal replacement therapy. *Ram Gokal* S-23

Urea kinetic and middle molecule approaches to assessing the adequacy of hemodialysis and CAPD. *Prakash Keshaviah* S-28

Nutrition and adequacy of dialysis. How do hemodialysis and CAPD compare? *Jonas Bergström and Bengt Lindholm* S-39

Dialysis therapy in the elderly patient. *Allen R. Nissenson* S-51

Dialysis considerations for diabetic patients. *Ramesh Khanna* S-58

Continuous peritoneal dialysis for children: A decade of worldwide growth and development. *Steven R. Alexander and Masataka Honda* S-65

Complications of peritoneal dialysis related to increased intraabdominal pressure. *Joanne M. Bargman* S-75

Access problems plague both peritoneal dialysis and hemodialysis. *Karl D. Nolph* S-81

Options in dialysis therapy: Significance of cardiovascular findings. *Volker Wizemann, Mario Timio, Martin A. Alpert, and Wilfred Kramer* S-85

Mineral metabolism and renal bone disease: Effects of CAPD versus hemodialysis. *Jack W. Coburn* S-92

Transplantation in peritoneal dialysis and hemodialysis. *James F. Winchester, Carlos Rotellar, Mariella Goggins, Donna Robino, Mohammed R. Alijani, Thomas A. Rokowski, and William P. Argy* S-101

Residual renal function and recovery of renal function in patients treated by CAPD. *Jacques Rottembourg* S-106

Anemia and erythropoietin in hemodialysis and continuous ambulatory peritoneal dialysis. *Stephen M. Korbet* S-111

Non-medical factors that impact on ESRD modality selection. *Allen R. Nissenson, Sarah S. Prichard, Ignatius K.P. Cheng, Ram Gokal, Minoru Kubota, Rosario Maiorca, Miguel C. Riella, Jacques Rottembourg, and John H. Stewart* S-120

Instructions for Authors on page iv

Table of contents

EDITORIAL REVIEW

Pathophysiology of experimental nonoliguric acute renal failure. *Nishio Honda and Akira Hishida* 513

LABORATORY INVESTIGATION

Autosomal-dominant polycystic kidney disease in the rat. *Benjamin D. Cowley, Jr., Seshagirirao Gudapaty, Amy L. Kraybill, Brian D. Barash, Michael A. Harding, James P. Calvet, and Vincent H. Gattone, II* 522

Membrane currents controlled by physical forces in cultured mesangial cells. *William Craelius, Margery J. Ross, Dennis R. Harris, Victor K. Chen, and Carlos E. Palant* 535

Soluble aggregates of IgG and immune complexes enhance IL-6 production by renal mesangial cells. *Marieke E.A. van den Dobbelsteen, Fokko J. van der Woude, Willeke E.M. Schroeijers, Leendert A. van Es, and Mohamed R. Daha* 544

Parathyroid hormone raises cytosolic calcium in pancreatic islets: Study on mechanisms. *George Z. Fadda, Prassert Thanakitcharu, Miroslaw Smogorzewski, and Shaul G. Massry* 554

Differential effects of 1,25-$(OH)_2D_3$ and 22-oxacalcitriol on phosphate and calcium metabolism. *Jane L. Finch, Alex J. Brown, Noboru Kubodera, Yashuho Nishi, and Eduardo Slatopolsky* ... 561

Intra-GBM site of the functional filtration barrier for endogenous proteins in rats. *Yoshihide Fujigaki, Mitsumasa Nagase, Shuzo Kobayasi, Sumi Hidaka, Masahiko Shimomura, and Akira Hishida* 567

Role of proteoglycans and cytoskeleton in the effects of TGF-β1 on renal proximal tubule cells. *H. David Humes, Takamichi Nakamura, Deborah A. Cieslinski, Diane Miller, Robert V. Emmons, and Wayne A. Border* 575

High glucose inhibits cytosolic calcium signaling in cultured rat mesangial cells. *Paolo Menè, Giuseppe Pugliese, Flavia Pricci, Umberto Di Mario, Giulo A. Cinotti, and Francesco Pugliese* . 585

Binding of bacterial adhesins to rat glomerular mesangium *in vivo*. *Aaro Miettinen, Benita Westerlund, Ann-Mari Tarkkanen, Tom Törnroth, Päivi Ljungberg, Olli-Veikko Renkonen, and Timo K. Korhonen* 592

Effect of angiotensin II and norepinephrine on early growth response genes in the rat kidney. *Mark E. Rosenberg and Thomas H. Hostetter, with the technical assistance of Stefan Kren and David Chmielewski* 601

Reversible compensatory hypertrophy in rat kidneys: Morphometric characterization. *Melvin M. Schwartz, Monique Churchill, Anil Bidani, and Paul C. Churchill* 610

Effect of CsA on the expression of renin and angiotensin type 1 receptor genes in the rat kidney. *Alda Tufro-McReddie, R. Ariel Gomez, Laura L. Norling, Alaaedin A. Omar, Leon C. Moore, and Frederick J. Kaskel* 615

Susceptibility for infection-related glomerulopathy depends on non-MHC genes. *Marie-Louise F. van Velthuysen, Aletta Veninga, Jan Anthonie Bruijn, Emile de Heer, and Gert Jan Fleuren* ... 623

CLINICAL INVESTIGATION

Calcium kinetics and the long-term effects of lowering dialysate calcium concentration. *Àngel Argilés, Peter G. Kerr, Bernard Canaud, Jean Louis Flavier, and Charles Mion* 630

Contents continued on next page

Immuno-effector characteristics of peritoneal cells during CAPD treatment: A longitudinal study. *Michiel G.H. Betjes, Cornelis W. Tuk, Dirk G. Struijk, Raymond T. Krediet, Lambertus Arisz, Elisabeth C.M. Hoefsmit, and Rob H.J. Beelen* 641

β_2 integrins are required for neutrophil degranulation induced by hemodialysis membranes. *Alfred K. Cheung, Charles J. Parker, and Mary Hohnholt* 649

Renal interstitial expansion in insulin-dependent diabetes mellitus. *Pascale H. Lane, Michael W. Steffes, Paola Fioretto, and S. Michael Mauer* 661

Baseline analysis of renal function in the Diabetes Control and Complications Trial. *The Diabetes Control and Complications Trial Research Group, prepared by Mark E. Molitch, Michael W. Steffes, Patricia A. Cleary, and David M. Nathan* 668

Alpha-enolase: A novel cytosolic autoantigen in ANCA positive vasculitis. *Fleur D.L. Moodie, Brian Leaker, Geraldine Cambridge, Nicholas F. Totty, and Anthony W. Segal* 675

In situ production of TNF-α, IL-β and IL-2R in ANCA-positive glomerulonephritis. *Irene L. Noronha, Cornelia Krüger, Konrad Andrassy, Eberhard Ritz, and Rüdiger Waldherr* 682

PTH-induced osteoblast contraction is mediated by cysteine proteases. *Khai K.–T. Tram, Samuel S. Murray, David B.N. Lee, and Elsa J.B. Murray* 693

Hyperparathyroidism, platelet intracellular free calcium and hypertension in chronic renal failure. *Anthony E.G. Raine, Lindsey Bedford, Alec W.M. Simpson, Christopher C. Ashley, Richard Brown, J. Stuart Woodhead, and John G.G. Ledingham* 700

Calcium channel blockers protect transplant patients from cyclosporine-induced daily renal hypoperfusion. *Piero Ruggenenti, Norberto Perico, Lidia Mosconi, Flavio Gaspari, Ariela Benigni, Carmen S. Amuchastegui, Isabella Bruzzi, and Giuseppe Remuzzi* 706

Gene expression of interleukin-1β during hemodialysis. *Ralf Schindler, Silvia Linnenweber, Matthias Schulze, Martin Oppermann, Charles A. Dinarello, Stanley Shaldon, and Karl-Martin Koch* 712

Mutations in the codon for a conserved arginine-1563 in the COL4A5 collagen gene in Alport syndrome. *Jing Zhou, Martin C. Gregory, Jens Michael Hertz, David F. Barker, Curtis Atkin, Edwin S. Spencer, and Karl Tryggvason* 722

RAPID COMMUNICATION

Isolation and characterization of complement receptor type 1 from rat glomerular epithelial cells. *Richard J. Quigg, Mitchel L. Galisoff, Arthur E. Sneed, III, and David Kim* 730

NEPHROLOGY FORUM

Hepatorenal syndrome. *Mortimer Levy* 737

Le Journal Official de la Société Internationale de Néphrologie

Table of contents

EDITORIAL REVIEW

Parathyroid gland function in chronic renal failure. *Arnold J. Felsenfeld and Francisco Llach* .. 771

LABORATORY INVESTIGATION

Expression of insulin-like growth factor-1 in uremic rats: Growth hormone resistance and nutritional intake. *Winnie Chan, Kristoffer C. Valerie, and James C.M. Chan* 790

IGF-II/Man-6-P receptors in rat kidney: Apical localization in proximal tubule cells. *Shiying Cui, Allan Flyvbjerg, Søren Nielsen, Wieland Kiess, and Erik Ilsø Christensen*..... 796

Calcium antagonists and converting enzyme inhibitors reduce renal injury by different mechanisms. *Lance D. Dworkin, Judith A. Benstein, Miriam Parker, Evelyn Tolbert, and Helen D. Feiner* 808

Distribution of erythropoietin producing cells in rat kidneys during hypoxic hypoxia. *Kai-Uwe Eckardt, Stephen T. Koury, Chorh C. Tan, Stephen Schuster, Brigitte Kaissling, Peter J. Ratcliffe, and Armin Kurtz*..... 815

Lack of albuminuria in the early heterologous phase of anti-GBM nephritis in beige mice. *Geert W. Feith, Karel J.M. Assmann, M. José J.T. Bogman, Alphons P.M. van Gompel, Joost Schalkwijk, and Robert A.P. Koene*..... 824

Ca^{2+} oscillations in the rabbit renal cortical collecting system induced by Na^+ free solutions. *Henk P.G. Koster, Carel H. van Os, and René J.M. Bindels*..... 828

Molecular charge influences transperitoneal macromolecule transport. *John K. Leypoldt and Lee W. Henderson*..... 837

Vasopressin receptor-mediated endocytosis in cells transfected with V_1-type vasopressin receptors. *Ward Lutz, Mark Sanders, Jeffrey Salisbury, Stephen Lolait, Anne-Marie O'Carroll, and Rajiv Kumar* 845

Nonenzymatic glycation of mesangial matrix and prolonged exposure of mesangial matrix to elevated glucose reduces collagen synthesis and proteoglycan charge. *Sharon Silbiger, Susan Crowley, Zihe Shan, Michael Brownlee, Joseph Satriano, and Detlef Schlondorff*..... 853

Bilateral ureteral obstruction alters levels of the G-protein subunits $G_{\alpha s}$ and $G_{\alpha q/11}$. *Hiroyuki Yanagisawa, Jerry Morrissey, and Saulo Klahr* 865

CLINICAL INVESTIGATION

Gianturco self-expanding stent in the treatment of stenosis in dialysis access grafts. *Gerald A. Beathard*..... 872

Soluble CD23 as an effector of immune dysregulation in chronic uremia and dialysis. *Beatrice Descamps-Latscha, Andre Herbelin, Anh Thu Nguyen, Donat de Groote, Philippe Chauveau, Christian Verger, Paul Jungers, and Johanna Zingraff*..... 878

^{31}P NMR spectroscopy investigation of muscle metabolism in hemodialysis patients. *Daniel Durozard, Pierre Pimmel, Susana Baretto, Agnès Caillette, Michel Labeeuw, Gabriel Baverel, and Paul Zech*..... 885

Serial measurements of GFR in infants using the continuous iothalamate infusion technique. *University of California, San Francisco, San Francisco, California, and the Southwest Pediatric Nephrology Study Group (SPNSG), USA; prepared by Malcolm A. Holliday, David Heilbron, Amira Al-Uzri, Jon Hidayat, Ricardo Uauy, Susan Conley, Joan Reisch, and Ronald J. Hogg* .. 893

Contents continued on next page

Aluminum kinetics using bicarbonate dialysate with the sorbent system. *Francisco Llach, Peter W. Gardner, C.R.P. George, and Oscar Cairoli* 899

Adsorption of complement factor D by polyacrylonitrile dialysis membranes. *Manuel Pascual and Jürg A. Schifferli* 903

A multivitamin infusion prevents lipid peroxidation and improves transplantation performance. *Hans Rabl, Gholamali Khoschsorur, Thomas Colombo, Peter Petritsch, Michael Rauchenwald, Peter Költringer, Franz Tatzber, and Hermann Esterbauer* 912

Apolipoproteins and lipoprotein receptors in glomeruli in human kidney diseases. *Tsukasa Takemura, Kazuo Yoshioka, Naobumi Aya, Katsumi Murakami, Akiyo Matumoto, Hiroshige Itakura, Tatsuhiko Kodama, Hiroshi Suzuki, and Sunao Maki* 918

Identification and characterization of adenosine A_1 receptor-cAMP system in human glomeruli. *Yoshiyuki Toya, Satoshi Umemura, Tamio Iwamoto, Nobuhito Hirawa, Minoru Kihara, Nobuyoshi Takagi, and Masao Ishii* 928

A crossover comparison of progression of chronic renal failure: Ketoacids versus amino acids. *Mackenzie Walser, Sylvia B. Hill, Lynne Ward, and Laurence Magder* 933

Na, K-ATPace expression and cell volume during hypertonic stress in human renal cells. *Michael R. Yordy and Jesse W. Bowen* 940

TECHNICAL NOTE

Quantification of renal low-molecular-weight protein handling in the intact rat. *Marijke Haas, Dick de Zeeuw, Annie van Zanten, and Dirk K.F. Meijer* 949

NEPHROLOGY FORUM

Prostatic cancer. *Carl Olsson* 955

ABSTRACTS

Dutch Society of Nephrology 46th Scientific Meeting 966

INTERNATIONAL SOCIETY OF NEPHROLOGY

Proposal for amendments to the Constitution, By-laws and Rules of the International Society of Nephrology. *Claude Amiel, Paul Michielsen, and Klaus Thurau* 973

Meetings 978

Awards and Grants 980

Special Subscription Offer for Fellows 981

Table of contents

EDITORIAL REVIEW

Pathophysiology of low renin syndromes: Sites of renal renin secretory impairment and prorenin overexpression. *David J. Lush, Jean A. King, and John C.S. Fray* 983

LABORATORY INVESTIGATION

Colony stimulating factor-1 in the induction of lupus nephritis. *Roy D. Bloom, Sandrine Florquin, Gary G. Singer, Daniel C. Brennan, and Vicki Rubin Kelley* 1000

Recombinant human erythropoietin (rHuEPO) increases endothelin-1 release by endothelial cells. *Raul G. Carlini, Adriana S. Dusso, Chamberlain I. Obialo, Ulises M. Alvarez, and Marcos Rothstein* 1010

Effect of furosemide-induced hypokalemic metabolic alkalosis on renal transport enzymes. *Somchai Eiam-Ong, Neil A. Kurtzman, and Sandra Sabatini* 1015

Catecholamines and phosphate excretion by the remnant kidney. *Jorge Isaac, Theresa J. Berndt, Vijaya Thothathri, Gertrude M. Tyce, and Franklyn G. Knox* 1021

Spatial organization of the extracellular matrix modulates the expression of PDGF-receptor subunits in mesangial cells. *Martin Marx, Thomas O. Daniel, Michael Kashgarian, and Joseph A. Madri* 1027

Alterations in the neuroendocrine control of growth hormone secretion in the uremic rat. *Daniel L. Metzger, James R. Kerrigan, Richard J. Krieg Jr., James C.M. Chan, and Alan D. Rogol* . 1042

Number and dimensions of rat glomerular capillaries in normal development and after nephrectomy. *Jens Randel Nyengaard* 1049

Morphology of ischemic acute renal failure, normal function, and cyclosporine toxicity in cyclosporine-treated renal allograft recipients. *Kim Solez, Lorraine C. Racusen, Niels Marcussen, Irena Slatnik, Paul Keown, James F. Burdick, and Steen Olsen* 1058

Protein intake affects levels of G-protein subunits $G_{\alpha i2}$, $G_{\alpha i3}$, and G_{β} in rat glomerular membranes. *Hiroyuki Yanagisawa, Jerry Morrissey, and Saulo Klahr* 1068

Effect of chronic lithium treatment upon the Na^+-coupled cotransporters in renal brush border membranes. *Ahad N.K. Yusufi, Sten Christensen, and Thomas P. Dousa* 1074

CLINICAL INVESTIGATION

Juvenile cystic kidneys (*jck*): A new mouse mutation which causes polycystic kidneys. *Anthony Atala, Michael R. Freeman, James Mandell, and David R. Beier* 1081

Metabolic effects of hemodialysis with and without glucose in the dialysate. *Yves Bouffard, Sylvie Tissot, Bertrand Delafosse, Jean Paul Viale, Guy Annat, Olivier Bertrand, and Jean Motin* ... 1086

Hemodialysis vascular access morbidity in the United States. *Harold I. Feldman, Philip J. Held, John T. Hutchinson, Eva Stoiber, Marguerite F. Hartigan, and Jesse A. Berlin* 1091

Potassium supplementation ameliorates mineralocorticoid-induced sodium retention. *G. Gopal Krishna and Shiv C. Kapoor* 1097

Parathyroid sensing of the direction of change of calcium in uremia. *Jonathan T.C. Kwan, Jeanette C. Beer, Kate Noonan, and John Cunningham* 1104

Forty-five year follow-up after uninephrectomy. *Deborah M. Narkun-Burgess, Charles R. Nolan, James E. Norman, William F. Page, Peter L. Miller, and Timothy W. Meyer* 1110

Contents continued on next page

A splicing mutation in the α5(IV) collagen gene of a family with Alport's syndrome. *Shinsuke Nomura, Gengo Osawa, Tetsujun Sai, Teruo Harano, and Keiko Harano* 1116

Early dosing practices and effectiveness of recombinant human erythropoietin. *Neil R. Powe, Robert I. Griffiths, Joel W. Greer, Alan J. Watson, Gerard F. Anderson, Gregory de Lissovoy, Robert J. Herbert, Paul W. Eggers, Roger A. Milam, and Paul K. Whelton* 1125

Sleep disordered breathing in ESRD: Acute beneficial effects of treatment with nasal continuous positive airway pressure. *Mark R. Pressman, Robert L. Benz, Charles R. Schleifer, and Donald D. Peterson* 1134

Complement activation during OKT3 treatment: A possible explanation for respiratory side effects. *Maarten H.M. Raasveld, Frederike J. Bemelman, Peter Th.A. Schellekens, Frank N.J. van Diepen, Annemarie van Dongen, Eric A. van Royen, C. Erik Hack, and Ineke J.M. ten Berge* 1140

Role of monocytes in cryoglobulinemia-associated nephritis. *Dario Roccatello, Ciro Isidoro, Gianna Mazzucco, Angela Mesiti, Giacomo Quattrocchio, Alessandro Amore, Andrea Molino, Rosanna Coppo, Luigi M. Sena, and Giuseppe Piccoli* 1150

TECHNICAL NOTE

An *in vitro* method for the determination of protein turnover in incubated proximal tubule segments. *Robert May, Brian Logue, Byrad Edwards, and Swati Patel* 1156

NEPHROLOGY FORUM

Mechanisms of ischemic acute renal failure. *Joseph V. Bonventre* 1160

EDITORIAL REVIEW

Treatment and prevention of hyperkalemia in end-stage renal disease. *Michael Allon* 1197

LABORATORY INVESTIGATION

Long-term effects of antihypertensive regimens on renal hemodynamics and proteinuria. *Scott A. Brown, Carol L. Walton, Pat Crawford, and George L. Bakris* 1210

Thromboxane and prostacyclin differentially regulate murine extracellular matrix gene expression. *Leslie A. Bruggeman, Jill A. Pellicoro, Elizabeth A. Horigan, and Paul E. Klotman* 1219

Glycine reduces early renal parenchymal uptake of cisplatin. *Samuel N. Heyman, Kate Spokes, Merrill J. Egorin, and Franklin H. Epstein* 1226

Intrarenal localization of angiotensin II type 1 receptor mRNA in the rat. *Yoshihiko Kakinuma, Agnes Fogo, Tadashi Inagami, and Iekuni Ichikawa* 1229

Renal response to ANP in normal dogs during extreme inhibition of distal Na^+ transport. *Mortimer Levy and Peter Cernacek* 1236

Oxidized low-density lipoprotein in experimental focal glomerulosclerosis. *Alex B. Magil, Jiri J. Frohlich, Sheila M. Innis, and Urs P. Steinbrecher* 1243

PCR localization of angiotensin II receptor and angiotensinogen mRNAs in rat kidney. *Yoshio Terada, Kimio Tomita, Hiroshi Nonoguchi, and Fumiaki Marumo* 1251

Effect of monoclonal anti-ANP antibodies on the acute functional adaptation to unilateral nephrectomy. *Jean-Pierre Valentin, Jean Ribstein, Dominik Neuser, Jürg Nüssberger, and Albert Mimran* 1260

Altered growth factor expression during toxic proximal tubular necrosis and regeneration. *Walter A. Verstrepen, Etienne J. Nouwen, Xio S. Yue, and Marc E. De Broe* 1267

Hemodynamic role of arachidonate 12- and 5-lipoxygenase in nephrotoxic serum nephritis. *Sheng-Hua Wu, Barbara A. Bresnahan, and Elias A. Lianos* 1280

ADH resistance of LLC-PK_1 cells caused by overexpression of cAMP-phosphodiesterase type-IV. *Mario Yamaki, Steven McIntyre, Josie M. Murphy, Johannes V. Swinnen, Marco Conti, and Thomas P. Dousa* 1286

Natural killer-cell function in hemodialysis patients: Effect of the dialysis membrane. *Philippe Zaoui and Raymond M. Hakim* 1298

CLINICAL INVESTIGATION

Role of EDRF (nitric oxide) in diabetic renal hyperfiltration. *Norman Bank and Hagop S. Aynedjian* 1306

Effect of aluminum mobilization on hemoglobin during the first six months after transplantation. *Andrew Davenport, Kenneth E. Newton, Colin Toothill, Eric J. Will, and Alexander M. Davison* 1313

Water soluble vitamins in chronic hemodialysis patients and need for supplementation. *Eric Descombes, Alfred B. Hanck, and Gilbert Fellay* 1319

Alpha1-antitrypsin genetic polymorphism in ANCA-positive systemic vasculitis. *Vincent L.M. Esnault, Angelo Testa, Marie Audrain, Christophe Rogé, Mohamed Hamidou, Jacques H. Barrier, Richard Sesboüé, Jean-Pierre Martin, and Philippe Lesavre* 1329

Contents continued on next page

Capillary deposition of C4d complement fragment and early renal graft loss. *Helmut E. Feucht, Helmut Schneeberger, Günther Hillebrand, Klaus Burkhardt, Max Weiss, Gert Riethmüller, Walter Land, and Ekkehard Albert* 1333

Effect of dialysate osmolarity on the transport of low-molecular weight solutes and proteins during CAPD. *Alexander L.T. Imholz, Gerardus C.M. Koomen, Dirk G. Struijk, Lambertus Arisz, and Raymond T. Krediet* 1339

Viral DNA in microdissected renal biopsy tissue from HIV infected patients with nephrotic syndrome. *Paul L. Kimmel, Andrea Ferreira-Centeno, Tunde Farkas-Szallasi, A.A. Abraham, and Carleton T. Garrett* 1347

Hepatitis C in dialysis patients: Relationship to blood transfusions, dialysis and liver disease. *Freddy Knudsen, Per Wantzin, Knud Rasmussen, Søren D. Ladefoged, Niels Løkkegaard, Lars S. Rasmussen, Anders Lassen, and Kim Krogsgaard* 1353

Methicillin-resistant *Staphylococcus aureus* nasal carriage and infections in CAPD. *Wai Choong Lye, See Odd Leong, and Evan Jon Choon Lee* 1357

Clinicopathology of kidneys from brain-dead patients treated with vasopressin and epinephrine. *Tomofumi Nagareda, Yoshihiro Kinoshita, Akira Tanaka, Masashi Takeda, Tsutomu Sakano, Kohei Yawata, Tsuyoshi Sugimoto, Yasuko Nishizawa, and Nobuyuki Terada* 1363

Accumulation of carboxy-terminal fragments of parathyroid hormone-related protein in renal failure. *John J. Orloff, Neil E. Soifer, Joseph P. Fodero, Pamela Dann, and William J. Burtis* . 1371

A randomized trial of cyclosporine in steroid-resistant idiopathic nephrotic syndrome. *Claudio Ponticelli, Gianfranco Rizzoni, Alberto Edefonti, Paolo Altieri, Emilio Rivolta, Stefano Rinaldi, Luciana Ghio, Egidio Lusvarghi, Rosanna Gusmano, Fransesco Locatelli, Sonia Pasquali, Alfonso Castellani, and Ornella Della Casa-Alberighi* 1377

HISTORICAL ARCHIVES

Edema and uremia from 1827 to 1905: The first faltering steps of renal pathophysiology. *Gabriel Richet* 1385

KIDNEY INTERNATIONAL

Volume 43, Supplement 41, June 1993

"Contemporary Management of Renal Failure"

Second Hospal International Forum

Jomtien, Thailand

February 9–13, 1992

Table of contents

Introduction. *Robert M. Lindsay, Alexander Davison, Karl Koch, and Charles van Ypersele de Strihou, Guest Editors* S-1

WORLDWIDE DEMOGRAPHICS AND FUTURE TRENDS

Editorial: Worldwide demographics and future trends. *Charles van Ypersele de Strihou* S-2

Worldwide demographics and future trends in end-stage renal disease. *Friedrich K. Port* S-4

Future trends of management of renal failure in diabetics. *Daniel Cordonnier, François Bayle, Pierre-Yves Benhamou, Robert Milongo, Philippe Zaoui, Claire Maynard, and Serge Halimi* .. S-8

Diabetic patients on dialysis: A changing picture. *Giorgina B. Piccoli, Francesco Quarello, Franco Bonello, Mario Salomone, Giorgio Triolo, Stefano Maffei, Gian Maria Iadarola, Emanuel Stramignoni, Marco Borca, Giulietta Beltrame, Pier Luigi Cavalli, Giuseppe Piccoli, and Antonio Vercellone* S-14

Worldwide demographics and future trends of the management of renal failure in the elderly. *Françoise Mignon, Catherine Michel, France Mentre, and Béatrice Viron* S-18

Dialysis in patients over 65 years of age. *D. Verbeelen, W. de Neve, P. Van der Niepen, and J. Sennesael* S-27

Worldwide demographic aspects of chronic renal failure in children. *Rosanna Gusmano and Francesco Perfumo* S-31

Contemporary management of renal failure: Outcome of the failed allograft recipient. *Daniel C. Cattran and Stanley S.A. Fenton* S-36

COMPLICATIONS ARISING IN PATIENTS ON LONG-TERM HEMODIALYSIS

Editorial: Complications arising in patients on long-term hemodialysis. *Alexander M. Davison.* S-40

Cardiovascular issues

Cardiac hypertrophy and arterial alterations in end-stage renal disease: Hemodynamic factors. *G.M. London, S.J. Marchais, A.P. Guerin, F. Metivier, and B. Pannier* S-42

New techniques to determine fluid status in hemodialyzed patients. *Karel M.L. Leunissen, Peter Kouw, Jeroen P. Kooman, Emile C. Cheriex, Peter M.J.M. deVries, Albert J.M. Donker, and Johannes P. van Hooff* S-50

Plasma cGMP level as a marker of the hydration state in renal replacement therapy. *Frank Lauster, Jörg Martin Heim, Christian Drummer, Hans-Jürgen Fülle, Rupert Gerzer, and Helmut Schiffl* S-57

Effects of dialysate composition during hemodialysis on left ventricular function. *Juan Sztajzel, Patrick Ruedin, Catherine Stoermann, Christiane Monin, Jürg Schifferli, Michel Leski, Wilhelm Rutishauser, and René Lerch* S-60

Characterization of "refilling types" by continuous blood volume monitoring during hemodialysis. *A. Röckel, S. Abdelhamid, P. Fiegel, M. Menth, D. Walb, and D. Schneditz* S-67

Contents continued on next page

Does anemia correction by rHuEPO improve uremic cardiopathy? *P. Carletti, L. Bibiano, R. Boggi, D. Taruscia, and V. Mioli* S-70

Hyperhomocysteinemia, a risk factor for atherosclerosis in chronic uremic patients. *Philippe Chauveau, Bernadette Chadefaux, Marie Coudé, Joëlle Aupetit, Thierry Hannedouche, Pierre Kamoun, and Paul Jungers* S-72

Amyloidosis

Long-term complications of dialysis: Pathogenic factors with special reference to amyloidosis. *Fumitake Gejyo, Noriyuki Homma, and Masaaki Arakawa* S-78

Beta 2-microglobulin metabolism in uremic patients who are undergoing dialysis. *Jacques Chanard, Claude Vincent, Valerie Caudwell, Sylvie Lavaud, Olivier Toupance, Tony Wong, and Jean-Pierre Revillard* S-83

Role of uremic and endothelial factors in the development of β_2-microglobulin amyloidosis. *Yutaka Nakashima, Tadao Akizawa, Tetushi Nagai, and Shozo Koshikawa* S-88

Beta-2-microglobulin serum profiles in different settings of mass transport and fluid pyrogen content. *Alfonso Pacitti, Ciro Tetta, Giovanni Mangiarotti, Caterina Canavese, and Giuseppe Paolo Segoloni* S-96

Hemodialysis: Demonstration of truncated β_2-microglobulin in AB-amyloid *in situ*. *Reinhold P. Linke, Anette Kerling, and Astrid Rail* S-100

Ultrasonography of joint capsules and tendons in dialysis-related amyloidosis. *Michel Jadoul, Jacques Malghiem, Bruno Vande Berg, and Charles van Ypersele de Strihou* S-106

Influence of dialysis membranes on the development of dialysis associated osteoarthropathy. *Ryuzi Aoyagi, Yoshiaki Miura, Takeshi Ishiyama, Yoshie Maruyama, and Hisashi Hasegawa* S-111

Bone disease

Long-term complications of dialysis: Pathogenetic factors with special reference to bone. *James A. Delmez* S-116

Improvement of severe secondary hyperparathyroidism in dialysis patients by intravenous 1alpha(OH) vitamin D_3, oral $CaCO_3$ and low dialysate calcium. *Ph. Moriniere, N. El Esper, B. Viron, D. Judith, B. Bourgeon, Ch. Farquet, JD. Gheerbrant, MC. Chapuy, A. Van Orshoven, R. Pamphile, and A. Fournier* S-121

Improvement of secondary hyperparathyroidism and reduction of the set point of calcium after intravenous calcitriol. *F. Malberti, M. Surien, and P. Cosci* S-125

Kinetics of technetium-labeled heparin in hemodialyzed patients. *Ghandour Majdalani, Jean Chomant, Abdo Kachko, Mitsuru Yanai, and Nguyen-Khoa Man* S-131

Immunity

Long-term dialysis and cellular immunity: A critical survey. *Béatrice Descamps-Latscha and André Herbelin* S-135

Infection

Long-term complications of dialysis: Infection. *Izhar H. Khan and Graeme R.D. Catto* S-143

Antibodies to hepatitis C virus by second generation test in hemodialyzed patients. *Philippe Chauveau, Anne-Marie Courouce, Nadine Lemarec, Catherine Naret, Jean-Louis Poignet, Annie Girault, Mohamed Ramdame, and Simone Delons* S-149

Late seroconversion of C virus markers in hemodialysis patients. *J.A. Oliva, R.M. Maymo, J. Carrio, O. Delgado, and J.M. Mallafre* S-153

HLA genetic heterogeneity of hepatitis B vaccine response in hemodialyzed patients. *Sophie Caillat-Zucman, Jean-Jacques Giminez, Ginette Albouze, Bernard Lebkiri, Catherine Naret, Paul Jungers, and Jean-François Bach* S-157

Detection of hepatitis B viral DNA by polymerase chain reaction in dialysis patients. *J.M. Dueymes, M. Bodénès-Dueymes, J.L. Mahé, and B. Herman* S-161

Contents continued on next page

Miscellaneous chronic complications

Renal cell carcinoma in chronic hemodialysis patients—A 1990 questionnaire study in Japan. *Isao Ishikawa* S-167

Detrimental effects of late referral in patients with chronic renal failure: A case-control study. *Paul Jungers, Johanna Zingraff, Bernard Page, Ginette Albouze, Thierry Hannedouche, and Nguyen-Khoa Man* S-170

DIALYSATE AND REPLACEMENT FLUID RELATED ISSUES

Calcium and phosphate balance in dialysis patients. *James F. Winchester, Carlos Rotellar, Mariella Goggins, Donna Robino, Thomas A. Rakowski, and William P. Argy* S-174

Correction of acid-base balance by dialysis. *Pietro Zucchelli and Antonio Santoro* S-179

Analysis of the factors influencing bicarbonate balance during acetate-free biofiltration. *Antonio Santoro, Marco Spongano, Giuseppe Ferrari, Roberto Bolzani, Filippo Augella, Marcello Borghi, Mario Briganti, Leonardo Cagnoli, Dino Docci, Carlo Feletti, Maurizio Fusaroli, Andrea Gattiani, Giovanni Sanna, Carmine Stallone, and Pietro Zucchelli* S-184

Efficacy and tolerance of acetate free biofiltration: A central Italian multicenter trial. *Alberto Albertazzi, Pio Francesco Palmieri, and Ettore Mastrangelo* S-188

Dialysate bacteriological quality and the permeability of dialyzer membranes to pyrogens. *Gerhard Lonnemann* S-195

Ultrafiltration and endotoxin removal from dialysis fluids. *Antonio Di Felice, Gianni Cappelli, Francesca Facchini, Ciro Tetta, Fausta Cornia, Giuseppe Aimo, and Egidio Lusvarghi* S-201

Do cytokine-inducing substances penetrate through dialysis membranes and stimulate monocytes? *Kazuo Kumano, Shinji Yokota, Masato Nanbu, and Tadasu Sakai* S-205

BIOCOMPATIBILITY

A review of the concept of biocompatibility. *Gerald Schulman* S-209

Fibrinolytic activity during hemodialysis: A biocompatibility-related phenomenon. *Alejandro Martin-Malo, Francisco Velasco, Rafael Rojas, Domingo Castillo, Mariano Rodriguez, Antonion Torres, and Pedro Aljama* S-213

Platelet activation on hemodialysis: Influence of dialysis membranes. *Aleix Cases, Juan Carlos Reverter, Gines Escolar, Cristina Sanz, Jose Lopez-Pedret, Lluis Revert, and Antonio Ordinas* S-217

C5b-9 generation and cytokine production in hemodialyzed patients. *Giovanni Pertosa, Emilia A. Tarantino, Loreto Gesualdo, Vincenzo Montinaro, and Francesco Paolo Schena* S-221

In vitro production of tumor necrosis factor by monocytes cultured from dialysis patients. *James J. Ryan, Huw L.C. Beynon, Andrew J. Rees, and Michael J.D. Cassidy* S-226

Membrane biocompatibility: Effects on cardiovascular stability in patients on hemofiltration. *Andrew Davenport, Alexander M. Davison, and Eric J. Will* S-230

EXTRACORPOREAL MANAGEMENT OF ACUTE RENAL FAILURE

Acute renal failure in casualties of mass disasters. *Ori S. Better* S-235

Extracorporeal management of acute renal failure patients at high risk of bleeding. *David M. Ward and Ravindra L. Mehta* S-237

Effect of renal replacement therapy on patients with combined acute renal and fulminant hepatic failure. *Andrew Davenport, Eric J. Will, and Alexander M. Davison* S-245

ADEQUACY OF DIALYSIS

Urea modeling and Kt/V: A critical appraisal. *Robert H. Barth* S-252

Nutrition and adequacy of dialysis in hemodialysis patients. *Jonas Bergström* S-261

PCR, Kt/V and membrane. *Robert M. Lindsay, Evelyn Spanner, Paul Heidenheim, Claude Kortas, and Peter G. Blake* S-268

Unanswered questions pertaining to dialysis adequacy in 1992. *Stanley Shaldon* S-274

Contents continued on next page

Urea rebound and residual renal function in the calculation of Kt/V and protein catabolic rate. *Ginette Albouze, Mitsuru Yanai, Marcel Calamai, Didier Testou, Paul Jungers, and Nguyen-Khoa Man, with the technical assistance of Michèle Robinet* S-278

Death in conditions of cachexia: The price for the dialysis treatment of the elderly? *Giorgina Piccoli, Franco Bonello, Carlo Massara, Mario Salomone, Stefano Maffei, Gian Maria Iadarola, Emanuel Stramignoni, Clelia Rosati, Marco Borca, Paola Belardi, Francesco Quarello, Giuseppe Piccoli, and Antonio Vercellone* S-282

Patient survival on PAN/AN69 membrane hemodialysis: A ten year analysis. *Prem K.G. Chandran, Rebecca Liggett, and Brian Kirkpatrick* S-287

Indices of adequate dialysis in patients hemodialyzed with AN 69 membrane. *Pierre Simon, Kim Seng Ang, Gérard Cam, Abdelkader Benziane, Françoise Bonn* S-291

Is hemodiafiltration the dialysis modality of choice for the next decade? *Bernard Canaud, Peter Kerr, Angel Argilés, Jean-Louis Flavier, Franck Stec, and Charles Mion* S-296

Instructions for Authors on page vii
